

Ex: NO: 8b)

Date: 7/10/24

## Practical - 8b)

Aim:

configuration of wireless LAN using Cisco packet tracer

a) what is SSID of a wireless router?

SSID is the name of a wireless network. It is used to uniquely identify a wireless LAN.

b) what is a security key in a wireless router?

A security key in a wireless router is a password or encryption key used to secure a wireless network.

Result:

Thus, the wireless LAN has been configured using Cisco packet tracer & the output is verified.
